94% of Covid Deaths Are Fully Vaxxed, Study Shows

Hunter Fielding

🕒 October 16, 2023

💬 4 Comments

A new study based on official government data has revealed that 94% of Covid deaths were among patients who were fully vaccinated for the virus.

The study was based on data from the British government's Office for National Statistics (ONS).

The ONS recently published an update on deaths by vaccination status in England.

The data has shockingly revealed that the vaccinated population accounted for 95% of COVID-19 deaths in the 12 months between June 1, 2022, and May 31, 2023.

94% of those deaths were among the fully vaccinated – either the triple or quadruple-vaccinated – population.

We don't spam! Read our [privacy policy](#) for more info.

The dataset includes deaths by vaccination status between 1st April 2021 and 31st May 2023.

But because we have extensively looked at deaths up to the end of 2022 in previously published datasets we decided to take a look at Covid-19 deaths by vaccination status over a full year up to 31st May 2023, and the following chart shows what we discovered –

The unvaccinated accounted for the least amount of COVID-19 deaths in every single month up to May 2023, barely even getting into triple figures in most months.

Whereas the vaccinated population accounted for the majority of Covid-19 deaths every single month, hitting four figures in all but 2 months throughout that year.

But what's curious about the figures is that it's not the one-dose, or double-vaccinated population who account for the

majority of COVID-19 deaths throughout the 12 months, it's instead the triple and quadruple-vaccinated population that accounted for the majority of COVID-19 deaths.

With the most deaths occurring among the quadruple-vaccinated from August 2022 onwards.

The following chart shows the total number of COVID-19 deaths by vaccinated status throughout the entire year and reveals the true extent of the shocking statistics –

COVID-19 Deaths by Vaccination Status in England, 1st June 2022 to 31st May 2023

Source: Office for National Statistics / UK Government

The unvaccinated population barely broke into 4 figures throughout the entire year, hitting a total of 1,161 Covid-19 deaths, whereas the vaccinated population hit five figures with 20,336 Covid-19 deaths; 19,143 of which were among the triple and quadruple vaccinated.

This means, as is shown in the following chart, that the vaccinated population in England accounted for 95% of COVID-19 deaths between June 1, 2022, and May 31, 2023.

Whereas the unvaccinated population accounted for just 5%.

The triple and quadruple vaccinated shockingly accounted for 94% of all deaths among the vaccinated population, and as is shown in the following chart, 89% of all Covid-19 deaths, with the one-dose and two-dose vaccinated accounting for just 6% of Covid-19 deaths.

This is, however, still higher than the 5% of Covid-19 deaths among the unvaccinated population.

These aren't the kind of figures you would expect to see if the COVID-19 injections really are up to 95% effective at preventing death, are they?

With 95% of Covid-19 deaths in the full 12 months up to May 2023 being among the vaccinated it would appear they are in fact only 5% effective, and even that number is generous.

Fauci lied over his HIV medications in the early 1980s, the late Dr. Kary Mullis inventor of the PCR DNA sequencing test, that doesn't pick up a virus, especially a corona virus. He was brought in to overlook the HIV drug experiments of Anthony Fauci and found out that they were not built on "Gold Standard" Not separated from everything else, not purified. Yet they were still allowed out into the world in 1987 by the big pharma. The secret war between Dr. Kary Mullis and Anthony Fauci then followed. By 1997 California protests demanding that Anthony Fauci face justice for killing their loved ones. 100,000 people died on the lies of Anthony Fauci. And with Dr. Kary Mullis out of the way, he allegedly died of pneumonia on 07/08/2019 Anthony Fauci was placed at the helm of the Wuhan virus, covid vaccine and global lockdowns.

whatever the government tells you to do, do the opposite. the sheep that got vaccinated have a lot to learn. I had covid and a cold. the cold was worse than covid. covid, masks, 6 ft. apart, cashier shields, stay home, shut down the world, firing people in the medical field, and private sectors who refused to take the shot. blaming most deaths on covid was all b s. now the truth is coming out. notice it's coming from England, not America.
